

MUHAMMAD AWAIS GHANI

Software Engineer | Full-Stack Developer

Pakistan | 0315-9352386 | awaisghani442@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer (BS Computer Science, 7th Semester, University of Peshawar) with hands-on experience delivering 10+ production web and AI-integrated applications for 15+ direct clients since 2024. Comfortable owning a project end-to-end across the MERN stack, Django, and Laravel, with applied machine learning experience in computer vision and predictive analytics. Published researcher with a strong record of turning client requirements into working, deployed software.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, PHP, SQL

Frontend: React.js, Three.js / WebGL, HTML5, CSS3, MediaPipe

Backend: Django, Laravel, Node.js, Express.js, REST APIs, JWT Authentication

Databases: PostgreSQL, MongoDB, MySQL, SQLite

AI / Machine Learning: TensorFlow, Transfer Learning (VGG16, DenseNet-201), scikit-learn, Random Forest, Computer Vision

Tools & Platforms: Git/GitHub, Docker, Android WebView, Vercel

PROFESSIONAL EXPERIENCE

Freelance Full-Stack & AI/ML Developer — Direct Clients (Remote)

2024 – Present

- Delivered 10+ production-grade web and AI-integrated applications for 15+ direct clients across e-commerce, healthcare, agritech, and retail domains.
- Owned the full project lifecycle independently — requirements gathering, system design, development, deployment, and client communication.
- Built solutions spanning React/Three.js, Django, Laravel, and the MERN stack, with applied machine learning for predictive and computer-vision use cases.
- Designed and developed Final Year Project (FYP) systems for university clients, covering full-stack architecture and database design.

SELECTED PROJECTS

AuraLeathers — AI-Powered Custom Jacket Builder

React • Three.js • MediaPipe • Laravel • Docker • Android WebView

- Built an AI-powered 3D product customizer with real-time AR fitting using React, Three.js, and MediaPipe.
- Designed a Laravel REST API backend plus a companion native Android WebView application.

FruitVision AI

Python • TensorFlow • VGG16 • Tkinter • SQLite

- Built a desktop application using VGG16 transfer learning to classify Fresh vs. Rotten fruit.
- Implemented a Tkinter GUI with SQLite-based authentication for multi-user access.

Sales Prediction System

Python • Django • scikit-learn • Random Forest • Data Visualization

- Developed a Django web app that forecasts product sales from uploaded datasets using Random Forest regression.
- Added interactive data-visualization dashboards for actionable business insights.

AgroShield Store

React · Node.js · Express · MongoDB · TypeScript

- Built a full-stack AgriTech e-commerce marketplace with role-based Customer/Admin views.
- Implemented secure JWT authentication on a type-safe MERN architecture.

Healthify — Doctor Appointment System

Python · Django · PostgreSQL · Role-Based Access Control

- Engineered a multi-role (Patient/Doctor/Admin) appointment scheduling system with a custom rule-based symptom checker.
- Implemented role-based access control and a simulated payment flow.

10+ additional client and FYP projects available on GitHub and the portfolio site listed above.

EDUCATION

BS Computer Science — University of Peshawar

Expected 2027

- CGPA: 3.45 / 4.0 — Currently in 7th Semester
